- Competitive advantage for funding
- Driver/passenger protection
- Improved routing
- Improved vehicle maintenance
- "True" leasing

for Enhanced Fleet Management

Escalating fuel prices, rising insurance premiums and costly maintenance schedules are just a few of the obstacles facing fleet owners in today's challenging economy. To help contain costs while continuing to deliver the quality products and services their customers demand, savvy business owners, municipalities, nonprofit organizations and others are turning to onboard GPS vehicle tracking from Tracking Systems, Inc. (TSI).

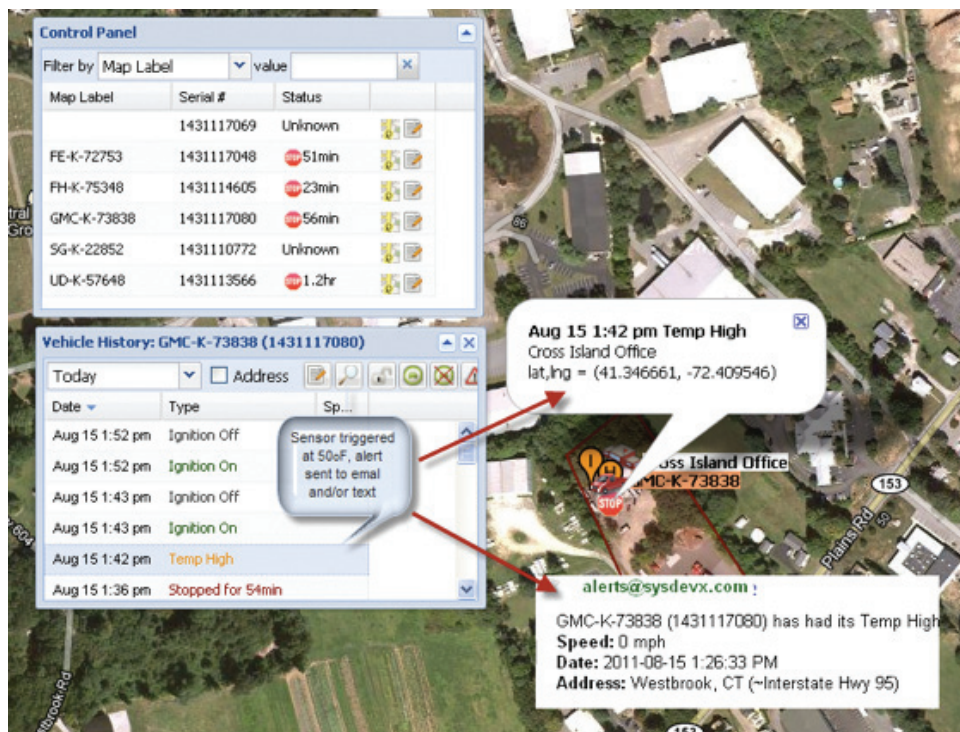

Our complete range of Web-based real-time fleet services — including detailed mapping and reporting capabilities — helps to reduce overhead by identifying and helping to resolve:

- Excessive idle times
- Unsafe driving practices
- Poor driver routing
- Fuel theft
- Unauthorized vehicle use
- Exaggerated overtime
- Speeding
- Wasted man hours, and more

The result? Improved efficiencies and a better bottom line for fleets of all sorts and all sizes. To learn how TSI can help tailor a custom GPS solution for your fleet, call us today 845.738.2200 or visit us at www.track-sys.com.

Why Tracking Systems?
